PROFESSIONAL SUMMARY

Results-oriented Data Analyst and aspiring Data Engineer with a robust foundation in statistical analysis, data architecture, and business intelligence. Proficient in leveraging Python, SQL, and Power BI to extract, transform, and visualize complex datasets, driving strategic, data-driven decision-making. Adept at bridging the gap between raw data and actionable business insights through rigorous analytical methodologies and continuous technical development.

EDUCATION

VIT-AP University

Sep 2024 – Jun 2029

Integrated M.Tech in Computer Science Engineering (in collaboration with Virtusa)

- **Current CGPA:** 8.0/10
- **Relevant Coursework:** Advanced Programming, Data Structures & Algorithms, Database Management Systems, Software Engineering

SR Junior College

Jun 2022 – Jun 2024

Intermediate (Class XII)

- **Percentage:** 94.8%

DAV Schools Network

Jun 2011 – Mar 2022

Secondary School (Class X)

- **Percentage:** 81.17%

TECHNICAL SKILLS

Programming Languages:	Python, SQL
Data Analysis:	Pandas, NumPy, Data Cleansing, Statistical Analysis, Data Transformation
Visualization & BI:	Power BI, Tableau, Matplotlib, Advanced Excel Dashboards
Databases:	MySQL, Relational Database Design
Cloud Infrastructure:	AWS Cloud Foundations, Oracle Cloud Infrastructure (OCI)
Development Tools:	Git, GitHub, HTML, CSS

PROJECTS

Sales Data Analysis Dashboard

- Engineered robust data pipelines using Python to clean, transform, and aggregate extensive sales datasets, ensuring high data integrity.
- Architected and deployed interactive business intelligence dashboards, enabling real-time monitoring of critical KPIs and overarching market trends.
- Delivered comprehensive, actionable data insights to cross-functional stakeholders, directly supporting strategic planning and revenue optimization initiatives.

Customer Data Analytics

- Spearheaded comprehensive exploratory data analysis (EDA) utilizing advanced SQL querying and Python statistical libraries to uncover latent consumer behavior patterns.
- Developed custom metrics and key performance indicators (KPIs) to quantify user engagement, segment target demographics, and predict customer churn.
- Synthesized complex analytical findings into compelling executive summaries and visual reports, facilitating data-informed stakeholder presentations.

Data Cleansing & Validation Pipeline

- Formulated and executed systematic data cleansing workflows, resolving missing values and rectifying anomalies across disparate datasets.
- Implemented rigorous data validation and transformation protocols to streamline operational reporting pipelines and enhance overall data quality.
- Designed standardized, scalable reporting templates that served as the foundational layer for advanced downstream predictive modeling and enterprise-level visualizations.

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- **Certifications:** Google AI Essentials, AWS Cloud Foundations, Oracle Cloud Infrastructure Foundations Associate, FreeCodeCamp Responsive Web Design.
- **Continuous Learning:** Actively pursuing advanced credentials in Cloud Architecture and Machine Learning to stay ahead of industry trends.
- **Soft Skills:** Strategic Problem Solving, Cross-Functional Communication, Attention to Detail, Analytical Thinking.
- **Languages:** English, Telugu.
